8 ABSTRACT OF THE DISCLOSURE

9 The present invention relates to a nectarine tree and more
10 particularly to a new and distinct variety broadly characterized by a
11 medium size, vigorous, hardy, self-fertile, productive and regular
12 bearing tree. The fruit matures under the ecological conditions
13 described approximately the third week in June, with first picking on
14 June 21, 2003. The fruit is uniformly large in size, excellent in
15 flavor, globose in shape, clingstone in type, very firm in texture, white
16 in flesh color, and red in skin color. The variety was developed as an
17 open pollinated seedling from an unnamed white flesh nectarine.
